15C. DATE SIGNED		16C. DATE SIGNED	
(Signature of person authorized to sign)		(Signature of Contracting Officer)	

**Q1:** . Specification Section 21 13 13 seems to be a little confusing with the actual scope of work. Item 1.3.3 on page 2, indicates Supply Water Calculations. Spec indicates that Hydraulic Calculations are required. Spec indicates that Fire Protection Engineer is required. Are Hydraulic Calculations required, since Water Data is in Spec? Is a Fire Protection Engineer required for the scope of work at hand?

**A1:** UFC 3-600-01 Section 4-1.2 requires the shop drawings and hydraulic calculations to be prepared by a NICET Automatic Sprinkler Systems, Level III or a NICET Special Hazards Suppression Systems, Level IV certified individual. Because backflow preventers are being added to the existing system, hydraulic calculations are required to be prepared.

UFC 3-600-01 Section 4-1.2 also requires the shop drawings to be stamped by a registered fire protection engineer. It is at the discretion of the contractor whether or not they utilize us or their own registered FPE.

**Q2:** With the new Louvers, removal of old louvers, removal of steam & condensate pipe, it appears that there will be some repair of prefinished metal fascia. What is the manufacture of the existing prefinished metal fascia?

**A2:** The roof, wall, and soffit system used in the 2001 project was manufactured by ULTRA SEAM.

**Q3:** Upon pre-bid site visit, there was a lot of furniture, computers, and personal belongings in every room. Who will be responsible for the removal and reinstallation of furniture? If contractor is responsible for the removal and reinstallation of furniture, what is the amount of furniture, as we did not access every room.

**A3:** Typical furniture includes the following but is not limited to:  
(80) Office chairs, (17) desk chairs, (3) Waiting room type chairs, (65) Book/storage shelves and lockers (48" wide typical), (15) Filing cabinets (4 drawer), (3) Filing cabinets (2 drawer), (15) Small tables, (42) Desks (office and classroom), (8) Desks with hutch (office), (2) Large tables, (6) Marker/tack boards. The contractor shall photograph, tag, record the location of, and provide electronic copy of furniture condition pictures and furniture locations to the government on CD before furniture removal. The contractor shall protect each item of furniture and is responsible for any damaged furniture. The contractor shall remove, store in weather tight location, and place furniture back in exact locations upon project completion.

The government is responsible for removing and storing items requiring electricity such as refrigerators, vending machines, wall mounted tv, etc.

The large topographic relief model table in the Night Vision Lab 121 will need to remain in place and be protected from damage. The contractor shall photograph and document the condition of the large topographic relief model table in the Night Vision Lab 121 and provide on the furniture CD before any work begins. The contractor is responsible for any damage.
